HOW TO RUN ON LOCALLY:

- 1. Create a folder as any name.
- 2. Open that folder in any code editor (vs code).
- 3. Open terminal (ctrl $+ \sim$) on code editor.
- 4. Type this code to get code locally. git clone https://github.com/4727yesuraju/crud.git
- 5. Now move to crud folder (cd crud in terminal)
- 6. Ignore client folder.
- 7. Here crud is root folder.
- 8 . In root folder create a .env file and create a PORT and CONN_STR variables and assign value.

ex: PORT = 3000 (commonly any number between 3000 - 8080).

CONN_STR = your mongodb_connection_string.

--- trouble in above process ?:

simply paste this code in .env file.

PORT = 5000

CONN_STR=mongodb+srv://4727yesuraju:rough@cluster0.wbclvtg.mongodb.net /?retryWrites=true&w=majority&appName=Cluster0

9 . After in terminal (in crud folder as root folder) type this command to run server.

npm i (installing all dependencies)

npm run dev (to run server)

10 . if you get below message in terminal then your server will running successfully.

```
PS C:\Users\4727y\OneDrive\Desktop\internshala\crud> npm run dev

> crud@1.0.0 dev
> nodemon api/index.js

[nodemon] 3.1.0
[nodemon] to restart at any time, enter `rs`
[nodemon] watching path(s): *.*
[nodemon] watching extensions: js,mjs,cjs,json
[nodemon] starting `node api/index.js`
Server is running on PORT : 5000
DB connected successfully
```

route and its functionality:

For this use any API using tools like Postman or Thunder Client. i use THUNDER CLIENT.

CREATE ROUTE:

1 . This route is used to create a new employee in database with a below fields.

username, empname, email, role, salary

2. in thunder client click on new request and select this options

method as post url as http://localhost:5000/api/user/create

pass this json data as a body as your required value.

```
{
"username": "jack",
"empname": "jack rider",
"email": "jack@gmail.com",
"role": "Front End Developer",
"salary": 60000
}
```

- 3 . finally press send to insert data in mongodb data base and get a inserted data as a response.
- 4 . If user is already in db it will return User is already exist as response. for more details visit below output images...
